- New Zealand's big trends:
 - Structural ageing
 - A tenure revolution
 - High-value targeting in the residential building industry
- The regions:
 - Older age structures but smaller populations of 65 yrs or more than in the big urban areas
 - House prices have jumped and building investment tends to be high value
 - Spill-over effects for Western Bay of Plenty from the Auckland effect
 - Widening inequalities impacts on the silver economy

The Rental Alternative for Older People

- Older people liked but not targeted by landlords except councils
- Tenure security is an issue for older people
 - Stock churn
 - Price pressure
 - Age-related eviction
- Stock problems
 - Too large
 - Not accessible
 - Poor thermal performance
 - Poor clustering – except retirement villages
